

Solutions - A Revolutionary Anthem

Written by Sophia Dady

Fourteen thousand miles away they judge because they can,
In their plush offices, very tall and grand.

*(Alt: In their plush offices, they couldn't give a damn.)

No reason to believe that there is a threat to man!
For years we've been presented with the scientific papers.
Books and documentaries are warning of the dangers.
For those in the field, we sing a different song.

Can't you see?
The Earth can't breathe.
The birds can't feed their young anymore...
It's Nature's law.

We're playing for a team.
A team that is the same,
Not working on our own behalf for our personal gain.
The right time isn't in the future, it is NOW!

Don't you see?
It's not about me.
So we all must pull together more...
It's Nature's law.

CHORUS

Find solutions, that's the key! (clap)(clap)
Join your voice and sing with me
The World deserves our respect.

Solutions come so easily (clap)(clap)
when you focus on these three:
Clean, Repair, Protect
Our World

CHORUS

Find solutions, that's the key (clap)(clap)
Join your voice and sing with me
The World deserves our respect

Solutions come so easily (clap)(clap)
when you focus on these three:
Clean, Repair, Protect
Our World

Our World

Our World
